

COGNITIVE ENHANCEMENT PROGRAM: GIVE YOUR BRAIN A BOOST

We all have weaknesses, but that doesn't mean school and work should be a constant struggle.

If you...

- find it hard to make sense of what your boss is asking you to do at work or feel defensive to feedback
- excel but only after taking longer than others to finish assignments and projects
- study diligently for tests but the results do not match the effort
- struggle to keep up in group conversations and tend to withdraw or avoid participating

"I listen to my professors, but wonder how the points they are making relate to each other. Before I know it, they are off on another topic."

...Eaton Arrowsmith Adults Cognitive Enhancement Program can help

IT'S ALL ABOUT CONNECTIONS

So much of school, work and life involve understanding how one concept connects to another.

Some people need to strengthen the parts of the brain responsible for making these connections before they can really excel.

FASTER & CONFIDENT UNDERSTANDING

The Cognitive Enhancement Program is designed for adults who want to complete tasks faster and with more confidence, as well as individuals with learning difficulties.

HOW THE PROGRAM WORKS

This part-time program uses the Symbol Relations or "Clocks" exercise to help adults practice making connections.

It's a well-known exercise that strengthens a person's ability to reason, understand cause and effect and process information quickly.

Reach your potential today!

Cognitive Enhancement Programs are available from October to May.
