

TEACHER-LED ONLINE CLASSES FOR CHILDREN WITH LEARNING DIFFICULTIES

OVER 40 YEARS OF CHANGING LIVES

THE ARROWSMITH PROGRAM IS NOW AVAILABLE AT YOUR HOME

Designed for parents who want a proven program as part of their child's school experience- 100% of online students have shown significant progress

THE ARROWSMITH DIFFERENCE

The Arrowsmith program is built on the research into neuroplasticity -- the idea that your child's unique brain can develop and strengthen.

Our teachers first assess your child's specific cognitive capabilities and then design a targeted plan to enable your child to:

- Learn successfully with fewer supports and compensations
- More effectively assess social situations and build relationships
- Improve their reading comprehension, writing, and Mathematical problem solving
- Enhance their ability to self-manage and follow instructions

PROGRAM OPTIONS TO MEET YOUR FAMILY'S NEEDS

HALF DAY

10 Months
4 hours/day, 5 days/week
All Cognitive Areas

Designed for students needing comprehensive cognitive development alongside their school program

4 HOURS A WEEK

10 Months
1 hour/day, 4 days/week
Select Cognitive Areas

Designed for students with fewer areas of cognitive need or less time available

8 WEEK INTENSIVE

8 Weeks
3 hours/day, 5 days/week
Symbol relations

Designed for rapid, focused improvement in math, logical reasoning and understanding of cause & effect

HOW IT WORKS

PROGRAM DESIGNED FOR YOUR CHILD'S UNIQUE LEARNING PROFILE

The Arrowsmith Program Assessment can identify your child's unique cognitive profile. This profile is used to design the cognitive intervention necessary to improve school performance.

REAL-TIME FEEDBACK

An Arrowsmith certified teacher will monitor your child's performance minute by minute. Feedback to the child allows them to stay on-task and master levels of cognitive performance.

RESEARCHED BASED SOLUTIONS

The Arrowsmith Program has been involved in research for decades in order to improve assessment and delivery. [Click here to learn more.](#)

- INDIVIDUALIZED
- ENHANCING BRAIN FUNCTIONING
- CHANGING COGNITIVE CAPACITIES
- ARROWSMITH CERTIFIED TEACHERS
- AT HOME

The team of certified Arrowsmith Program teachers are ready to guide your child to improve their cognitive functioning.

For many children, it is the first time in their lives that their own learning success is attributed to their effort to overcome cognitive challenges. Children begin to understand that their ability to achieve is directly related to the remarkable capacity of the brain to change itself.

Once the child has completed the Arrowsmith Program their ability to learn without strategies, compensations and an abundance of learning support increases significantly.

“ THIS RESEARCH IS TRANSFORMING OUR THINKING OF THE FIELD OF LEARNING DISABILITIES. ”

“ STUDIES CONDUCTED IN SCHOOLS UTILIZING THE ARROWSMITH PROGRAM HAVE SHOWN A SHARP REDUCTION IN THE NEED FOR SPECIAL EDUCATION SERVICES. ”

TESTIMONIALS

"I wanted to write and let you know how much we appreciate all you have done to make this new learning environment enriching, fun and motivating for the students." - Astrid and Andrew

"I have noticed that our home conversations on a daily basis have been more fluid and she understands more readily."

"I am so proud how well Jack has adapted to this new program. He has shown a great deal of maturity and improved organizational skills. Jack seems really happy with the support and structure he is receiving."

"The transition from a regular EAS classroom to the online program has been seamless. In fact, my daughter is performing better on her cognitive exercises online given she is often distracted in a classroom setting."

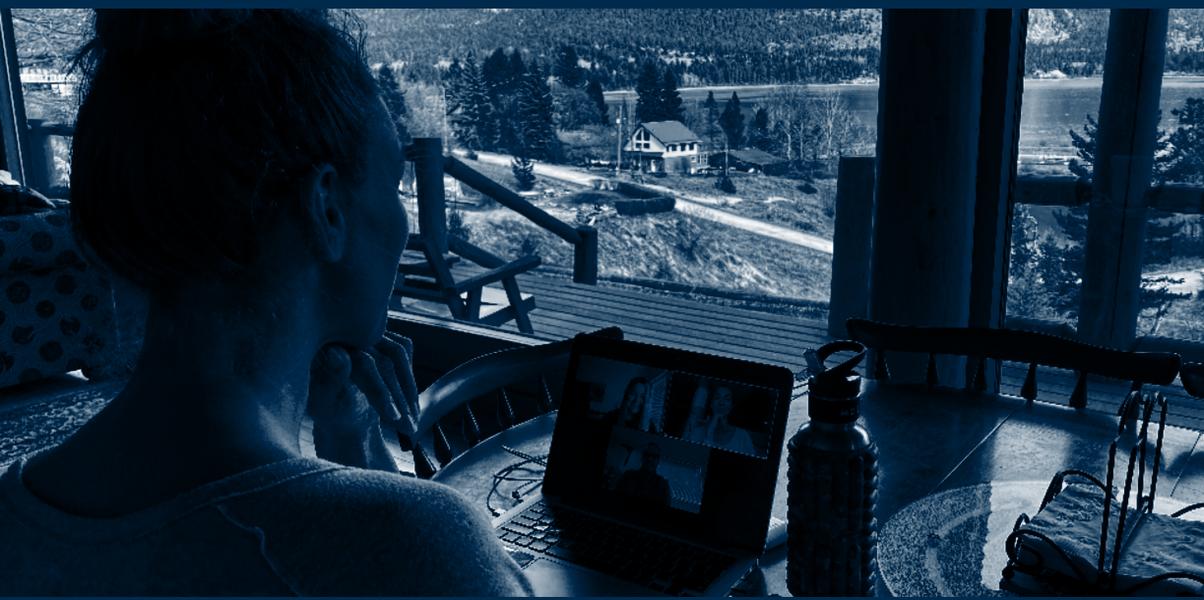

Arrowsmith Program research conducted by Dr. Rose and Dr. Jagger-Rickels from Southern Illinois University discovered that children with learning disabilities have **brain network connectivity problems**.

Dr. Jagger-Rickels studied what would happen to these brain networks after an intensive 6-Week Arrowsmith Program intervention. This research highlighted the fact that the Arrowsmith Program was **changing this connectivity dysfunction and transforming the brain network activity to improved functional connectivity** with related improvements in the cognitive abilities these brain networks are associated with such as processing speed and cognitive efficiency.

This research is transforming our thinking in the field of Learning Disabilities. We now know that **a child can improve brain network connectivity** that is likely part of the neurobiological basis of learning disabilities.

HOW IS EATON ARROWSMITH SCHOOL ONLINE DIFFERENT FROM OTHER OPTIONS?

TIME ENGAGED

Parents want to know the intervention period will be enough for their child. The Half-Day Program (10 months) offered by EASO provides over 500% more targeted online at home cognitive intervention than other software based cognitive intervention options available in the marketplace. Other options usually last 6 to 8 weeks with approximately 100 hours of cognitive intervention. Even the 8 Week at Home Cognitive Intensive Program offered by EASO provides 50% more cognitive intervention within the same time as other options. Frequency and intensity of cognitive intervention is critical for initiating brain plasticity.

CERTIFIED TEACHER-LED ONLINE INSTRUCTION

Parents want qualified teachers for their children. EASO hires and trains certified Arrowsmith Program teachers. The teachers are trained to understand brain functioning, how to harness neuroplasticity, and how to keep children engaged on challenging cognitive tasks. The certified teacher establishes trust and confidence in the child, who is then willing to take on challenges they previously never thought possible. The teacher is in contact with the student minute by minute as they monitor the child's performance through tablet technology and Microsoft Teams classroom video conferencing.

INDIVIDUALIZED INTERVENTION FROM ASSESSMENT TO PROGRAMMING

Parents want individualized intervention or programming for their child. EASO can provide this opportunity through the Arrowsmith Assessment conducted for Part-Time and Half-Day at Home students. The neurological profile is assessed by focusing on 19 cognitive functions critical for school and work success. Parents receive the assessment, and then teachers implement a program focused in on the cognitive weaknesses identified in the assessment. Progress is analyzed daily, and feedback given to children minute by minute as they engage in their program.

REAL-TIME, CLOUD-BASED FEEDBACK TO STUDENTS, PARENTS, AND TEACHERS

Parents want feedback on how their child is doing. In fact, feedback is critical in life. EASO offers parents and students' real-time feedback on a child's level of engagement in the program, and levels of mastery on each cognitive intervention task. How is this done? The certified teacher uses a technology platform that provides real-time data on their student's levels of engagement and tasks success. If a teacher identifies a student with low engagement, or struggling to master a cognitive task, the teacher can immediately engage with that student to solve roadblocks.

ONLINE CLASSROOM ENVIRONMENT TO INCREASE MOTIVATION AND REDUCE DISTRACTIONS

Parents want their children to be motivated to learn. One would think working at home would provide a child with more distractions. In fact, EASO is finding the opposite especially for children with learning differences. With no significant peer pressure, working on an individualized program, having real-time instant access to a teacher, and a focus on improving their weaknesses, focus and motivation is high. The Arrowsmith Program is also uniquely designed so that a child can master complex cognitive tasks giving them a strong sense of achievement, and that this achievement came from their own effort. This helps develop a growth mindset and can change how they approach other learning tasks. Effort equals success.
